Animal Feed Science and Technology is a leading international journal in the field of animal nutrition and feed technology. The journal covers all aspects of feed science and technology, including the development of new feed ingredients, feed processing, feed evaluation, and feed management. The journal is published quarterly by Elsevier.

The journal is a key source of information for researchers, feed manufacturers, and animal producers. It provides a platform for the publication of original research papers, reviews, and technical notes. The journal is indexed and abstracted in a number of major databases, including ScienceDirect, CAB International, and the Journal of the American Feed Manufacturers Association (JAFMA).

The journal is a member of the International Union of Pure and Applied Chemistry (IUPAC) and the International Union of Pure and Applied Physics (IUPAP). The journal is also a member of the International Union of Pure and Applied Mathematics (IUPM) and the International Union of Pure and Applied Biology (IUPB).
